Install Instructions Lotus Workflow 7.0

For the most current information about Lotus Workflow 7.0, you can go to any of these URLs:
- The Lotus Workflow Homepage at http://www.lotus.com/home.nsf/welcome/domworkflow
- The Documentation Library at http://www.lotus.com/ldd/doc

NOTE: If you are upgrading from Lotus Workflow release 3.0.1 or 6.5.1 to Lotus Workflow 7.0, please read the Migration Guide before proceeding.

The Lotus Workflow 7.0 installer must be run from a supported version of Windows that has IBM Lotus Notes 6.0.5 or later installed and configured. The IBM Lotus Workflow Engine templates and databases (samples and help file) can be installed directly to a Domino server from a LAN-connected Lotus Notes client, or installed in the client's Lotus Notes data directory and replicated to Domino Servers.

Go to the Workflow directory and select Start and Run from the Windows task bar. Then Select the Setup.exe file in the directory that contains the language version you wish to install.

NOTE: If you run Setup.exe from a non-mapped network drive. The installation will fail and you will see an error message "LaunchAppAndWait Failed". SOLUTION: Map the drive and run Setup.exe again.

All Lotus Workflow Engine templates should be installed to the root of the Notes data directory on all devices that use them.
